Date: 7-4-2025

Project title: Task manager for personal tasks.

Features:

- 1] We can enter a task and press add to save task in the "tasks" file after clicking save to file.
 - 2] We can choose any task and click complete to show task is complete then the [X] icon will be placed before that task.
 - 3] We can check task is complete or not in the file also, if there is true the task is completed.
 - 4] We can modify ~~the~~ "tasks.txt" file and click load in the GUI. Then the changes done in the file will be shown in the GUI.
 - 5] When the "Simulate Network" button is pressed a exception message is shown "Tasks processed(simulated network)."
 - 6] If we delete the "tasks.txt" file and then click load then error message is shown "Error loading tasks: tasks.txt (The system cannot find the file specified)."
- The 5 OOP features used are:
-

1) GUI → In the Todo GUI using JFrame, JList, etc.

2) Polymorphism → TaskProcessor interface implemented by FileTaskProcessor and NetworkTaskProcessor.

3) Multithreading → NetworkTaskProcessor (simulated delay) and Todo GUI. processTasks() with Swing Worker for background processing.

4) Exception handling: Try-catch blocks in FileTaskProcessor, TaskManager, Todo GUI.

5) Generics → Used in Result<T>, JList<Task>, DefaultListModel<Task>.
